

CORPORATE PROFILE

Our Advantages

BioQuest's virtual business model builds value rather than building companies. We offer:

- A highly experienced team providing extensive expertise and support services
- Rapid access to financing from private and public sources
- Acceleration of development timelines to and through the clinic
- Minimization of infrastructure requirements and increased efficiencies
- Access to an exceptional network of experts and resources

Our Focus

- To identify, invest in and advance the best new medical innovations
- To improve success by providing expertise, support services and access to an exceptional network of partners and resources
- To create value through a highly focused approach in all of our development and commercialization programs
- To provide products for unmet medical needs to fill biopharma and biotech company pipelines

We Excel at

- Managing risk
- Integrating skills and capabilities across a broad range of disciplines and functions
- Effectively advancing brilliant medical discoveries

BioQuest finds, funds, and manages the development of brilliant new medical innovations to fill biopharma and biotech company pipelines and generate exceptional returns for all of our stakeholders.

Mission

BioQuest turns medical research and innovation into commercial success, generating outstanding value for both inventors and investors.

Our Quest is to find, select and invest in brilliant new medical discoveries from around the world and apply our expertise and support to virtually manage and accelerate their successful development. We minimize infrastructure requirements, but maximize the benefits gained from the talent of both the scientists and management.

Business Model

BioQuest's business model creates lean companies with highly focused development programs, generating rapid advancement of our technologies and maximum returns for investors.

- We actively manage to accelerate development timelines
- We focus on the primary opportunity or lead indication for each technology
- We employ a virtual business model, sharing resources across multiple programs and companies to minimize costs
- We generate licensing and acquisition opportunities to feed biopharma and biotech company pipelines

The BioQuest team works with companies, technology transfer offices, and inventors in mutually beneficial arrangements that allow all parties to achieve their goals as quickly as possible.

BioQuest has a strong track record of realizing exceptional returns for all of our stakeholders.

If you would like an expert opinion on the commercial viability of your new technology, would like to discuss a potential partnership opportunity, or inquire about any of our licensing, acquisition or investment opportunities, please contact us.

RESEARCH & INVENTORS

BioQuest helps investigators, inventors, tech transfer offices and companies commercialize innovative technologies that have the potential to advance the science of human medicine. We offer a wealth of expertise and services, with a focus on building value by moving research into and through the clinic as rapidly as possible.

Advantages

- **Commercialization success**
We provide an outstanding blend of commercial and scientific expertise with a proven track record of success
- **Rapid access to financing**
We have a proven track record of rapidly accessing both private and public sources of financing
- **Expertise and support services**
Our expertise and extensive network allows scientists and inventors to continue to focus on what they do best
- **Continued scientific involvement**
We ensure scientists maintain an avenue for intellectual input and an ongoing connection to the development of the technology throughout development.
- **Significant return on investment**
We accelerate development time lines while minimizing infrastructure and investment requirements

We actively seek out promising new medical innovations, and we invest our own time, money, ideas and expertise to successfully accelerate the development of the technologies we select.

INDUSTRY & INVESTORS

We create investment and acquisition opportunities by finding, selecting and investing in new medical innovations where we can apply our expertise and support to virtually manage and accelerate their successful development. We minimize infrastructure requirements and have a strong track record of realizing exceptional returns for our investors.

Advantages

- **Promising technologies**
Identification, screening and advanced development of highly promising early-stage research in new medical technologies
- **Added value**
Rapid creation and movement of products into and through the clinic to accelerate value creation - we ensure key studies meet all GxP standards so that partners can focus on the path forward
- **Clean companies**
BioQuest companies are backed by a strong team of experienced negotiators and supportive investors that can be relied upon to ease the process during licensing or acquisition negotiations
- **Significant return on investment**
We have a strong track record of providing superior returns through our outstanding blend of commercial and scientific expertise
- **Secure intellectual property estates**
We provide thorough, reliable management of all intellectual property

BioQuest offers a strong portfolio of highly promising, advanced, innovative medical products and technologies, all of which are available for licensing and/or acquisition.

BioQuest expertise and support services include:

- Identification and screening of promising early-stage research in new medical technologies
- Licensing and contract negotiations
- Company creation
- Drug development management services
- Medical device development management services
- Private and public sources of financing
- CMO/CRO outsourcing
- Regulatory affairs support
- Business development
- Intellectual property management
- Investor relations
- General office services and administration
- Accounting and finance

If you would like an expert opinion on the commercial viability of your new technology, would like to discuss a potential partnership opportunity, or inquire about any of our licensing, acquisition or investment opportunities, please contact us.
